

Wrap Up Climate Change

European big climate action 2008

Who:

Wrap Up Climate Change is a collective action being run across Europe by young people, in the lead up to the next critical UN climate change negotiations.

You can run a stall in your town or city easily, and collect and contribute messages to one massive 'Wrap Up' sheet.

An action guide full of advice and background info is available, as well as images and news stories, on the Young FoEE website.

YOUNG Friends of the Earth Europe

What:

Across Europe we are collecting messages from the general public, onto squares of fabric 25cm x 25cm in size. The images people draw will answer: **'What do you want your government and global leaders to do to fight climate change?'**

Why:

These fabric squares will then form one massive message to be presented at the next UN climate negotiations in Poznan, December 2008, on what we demand must be done immediately to secure the future of our generation and the planets biodiversity.
